DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 - 3, drawn to a crimp state estimation apparatus, classified in class 72, subclass 17.2.
- II. Claims 4 - 6, drawn to a quality determination apparatus, classified in class 72, subclass 18.1.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because: Does not require "a determination unit". The subcombination has separate utility such as: Could be used in any crimp state estimation apparatus.
